## Saudi Oger Sponsors “Scuba Saudia” program for Marine ecological preservation

Saudi Oger sponsors “Scuba Saudia” Program, which is considered as one of the most important activities of the High Authority of Tourism, organized by the “Blue Reef Divers” Centers.

Saudi Oger will sponsor the training of 400 divers “Saudi Dolphins”, who in return becomes future instructors for the young Saudi's who wish to participate in this program. It will also include the largest beach clean-up operation of seashores and shallow seabed in the Western and Eastern Regions of the Kingdom.

Saudi Oger divers will also help in rescuing the corals in the Red Sea and the Arabian Gulf from destruction trends affected by throwing the anchorage of ships and yachts.

The “Birth of Human Dolphins” Program aims to spread the diving culture among the young generation in particular, and the Saudi community in general for the purpose of educating the youth in the Kingdom on their surrounding environmental issues and developing the feeling of ownership and association to the sea wealth, thus giving them the opportunity to participate and contribute in protecting their environment.

Saudi Oger support for this program is part of the company Corporate Social Responsibility to protect the various environmental wealth of the Kingdom of Saudi Arabia, and reinforces our continuous interest in the youth activities that enrich them professionally, culturally and socially.
